## PREFACE

This is the eighth of a series of reports published monthly or bi-monthly in an effort to provide continuous information on 28 selected military complexes, marshalling yards, storage areas and transfer points in South China and North Vietnam. The targets have been selected as those most likely to provide indications of a military buildup.\*

This study utilizes all photographic coverage taken and available during the preceding two months. Only those targets covered by interpretable photography are analysed and these are arranged alphabetically within country. The quality of photography for each entry is given with the mission reference

25X1

\* The list of targets is subject to periodic revision.
